CAREER STATEMENT

A pragmatic and enthusiastic software developer with particular emphasis on backed with django and python,c# but also conversant with frontend technologies html,css, javascript,bootstrap ,mysql and other database technologies. A financial analyst with advanced accounting and finance skills,that i use to develop financial enterprise softwares.Kindly visit my website to view my projects in the mentioned languages.

WORK EXPERIENCE

04/2019 - present

Freelance software development: Individual projects.

After finishing my contract at my previous company ,I decided to learn programming and software development from youtube and udemy online platforms.In under one year I was able to create a chama and sacco system for reporting financial transactions.The system can handle over 500 groups and is still under development.

I also developed a software as a service web application for bookkeeping and financial reporting that is being used by small businesses.The system handles sales ,purchases and expenses and reports profit or loss at the end of the month.I used Django,javascript and mysql database.The link of the project is in my website under projects.

04/2015 - 04/2019

Business development officer:Social economic integrated organization

Responsibilities:

- Maintaining the office accounting system and the database.
- Preparing financial statements and financial reporting.
- Providing technological solutions upon request by creating software to solve internal issues.ie I created a divided calculation software which was previously done

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office of National Statistics, 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a new paradigm of care for the ageing population, one that is based on the concept of 'active ageing'. This paradigm is based on the idea that older people should be able to live independently, to be active and to participate in society. The Department of Health (1999) has identified a number of key areas for action, including: (1) the need to develop a new paradigm of care for the ageing population; (2) the need to develop a new paradigm of care for the ageing population; (3) the need to develop a new paradigm of care for the ageing population.

The Department of Health (1999) has identified a number of key areas for action, including: (1) the need to develop a new paradigm of care for the ageing population; (2) the need to develop a new paradigm of care for the ageing population; (3) the need to develop a new paradigm of care for the ageing population.
